## Congress of the United States House of Representatives

August 24, 2023

The Honorable Antony J. Blinken  
Secretary, U.S. Department of State  
2201 C Street NW  
Washington, D.C. 20520

Re: Support for Ukraine's Clean Energy Security

Dear Secretary Blinken,

I write to convey the attached letter of support for Ukraine, signed by clean-tech leaders who firmly share my view that Ukraine's energy security will benefit from accelerating the green energy transition and scaling-up renewable energy sources and energy efficiency. Enabling Ukraine to rebuild with renewable and green resources will promote a more sustainable recovery for Ukraine and reflect our commitment to meeting targets required to help abate the climate crisis.

I respectfully request your thoughtful consideration of the letter and its message to ensure that both emergency support and recovery are aligned with a resilient and net-zero Green House Gases energy future. Thank you for your attention to this urgent matter, and I look forward to your response.

Sincerely,

Lloyd Doggett

**Dear Secretary Blinken,**

We, the undersigned cleantech businesses, endorse the United States' political, financial, humanitarian and military support provided to Ukraine since the beginning of Russia's full-scale invasion.

**We strongly believe that Ukraine's energy security will benefit from accelerating the energy transition and scaling-up renewable energy sources and energy efficiency.**

We offer our expertise and products to provide, e.g., photovoltaic and wind power systems, bioenergy systems, energy storage systems and heat pumps to allow a high level of energy autonomy and resilience in a very short amount of time.

Our industries and expertise offer technologies, services, financing to the entire portfolio of energy efficiency (i.e., heat pumps, sensors and controls, etc.), renewable energy (biomass, geothermal, solar, wind and water & marine energy), and energy storage (batteries, pumped hydro, fuel cells-hydrogen, compressed air & liquids, flywheels, etc.) -- all of which offer a high level of autonomy and resiliency in a very short time frame.

**We recommend that the U.S. initiates a mechanism to provide renewable energy sources and energy efficiency equipment at scale for emergency support and reconstruction.**

Our companies are ready to scale-up production to bolster energy security in Ukraine and remain at your disposal.

Sincerely yours,
